Note: *By filling up this form, you are aware that it will only be used for the study/thesis entitled Tourism Monitoring System for Bolinao*

What is the peak season for tourist activities in Bolinao? How about the average number of tourists daily/weekly/monthly/annually? *

Peak season is during long weekends and academic breaks. The average number depends on the season and current travel restriction.

What are the registered establishments and spots related to tourism in Bolinao? Is there any list of these available? Kindly share the offers of this establishments. *

Please visit our website for the list of spots and DOT Accredited establishments in Bolinao. As for the offers, we currently do not have any records because of the pandemic our activities are very limited

What is the primary workflow of Bolinao Tourism? *

Please elaborate this question

Who is responsible for processing tourist data? *

Statisticians

How does information be handled in the office regarding tourist activities? *

Please elaborate your question

What is the information that are being processed? How does it help? *

Please elaborate your question

What does this collected tourist data mean to the office? *

The collected data reflects how popular Bolinao is to tourists, with this data establishments can then plan on how they will handle the future.

What is the existing process of Bolinao Tourism regarding monitoring tourists' activities? *

During weekends and major events, our staffs usually conduct roving activities on tourist attractions and establishments accompanied by the PNP

What is the current problem in the current process that is being ignored? *

None

Do you feel like adding more interaction on the website like monitoring system? If yes, kindly enumerate. *

No. our website is solely used for information dissemination. And a monitoring system will not work on Bolinao because of how the terrain blocks network signal that is used in transmitting data from the client to the server and vv
